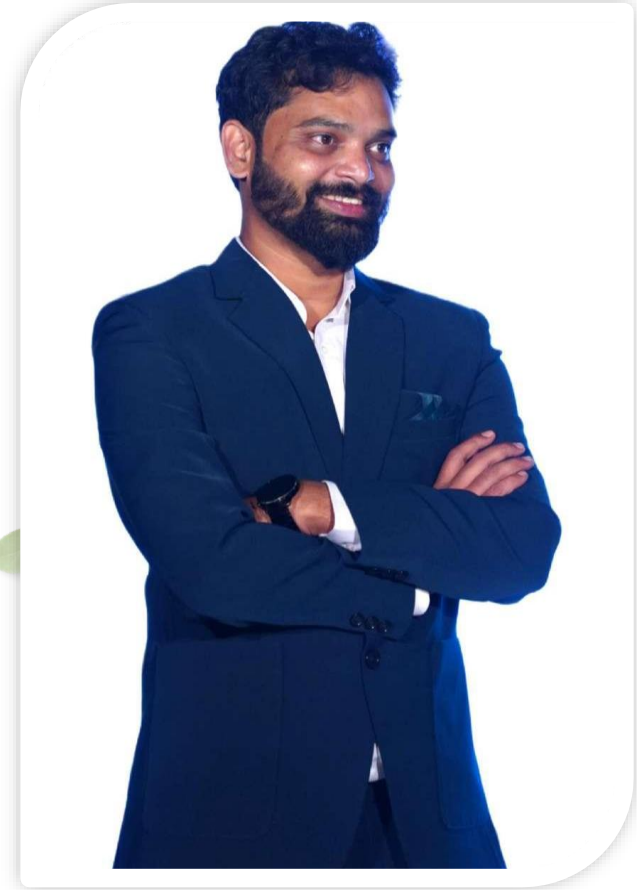
CEO's Profile



Name : K.B.Reddy (Nani Reddy)

Education : B.Tech (EEE)IT Experience : 9+ Years in Atum IT, Tech Mahindra, Mphasis, KPMG Companies.

Fortune Rise Groups, established in **August 2024**, is a creative landscaping firm specializing in the design of **residential, commercial, and hospitality** outdoor spaces. We create inspiring, functional, and sustainable landscapes that enhance property value while enriching everyday experiences.

From initial concept to final completion, our team combines innovative design with technical expertise to craft outdoor environments that are both visually striking and built to thrive. Every project is thoughtfully tailored to reflect our clients' vision while delivering lasting beauty, purpose, and value.

Our Vision

01

Vision

To be a leader in landscape architecture by delivering transformative designs that inspire and sustain.

02

Mission

To enhance communities and environments through visionary landscape design, innovative techniques, and exceptional service.

03

Core purpose & Philosophy

Highlight your passion for creating sustainable, aesthetic, and functional landscapes. Emphasize your philosophy about the environment, design, and innovation

04

Innovation and Creativity

Showcase your intent to push boundaries in design and technology. Talk about integrating modern techniques, smart landscaping solutions, or new materials.

Dr.Reddy’s @ Bachupally

Dr. Reddy's Bachupally, designed by **FRG**, features a thoughtfully planned outdoor café that seamlessly blends architecture and landscape to create a welcoming social space. The design emphasizes comfort, openness, and a strong connection with nature through lush planting, shaded seating, and carefully curated outdoor elements. Intended as a relaxing destination for informal meetings, coffee breaks, and social interactions, the café offers a vibrant yet tranquil ambience, enhancing the overall user experience while complementing the surrounding campus environment

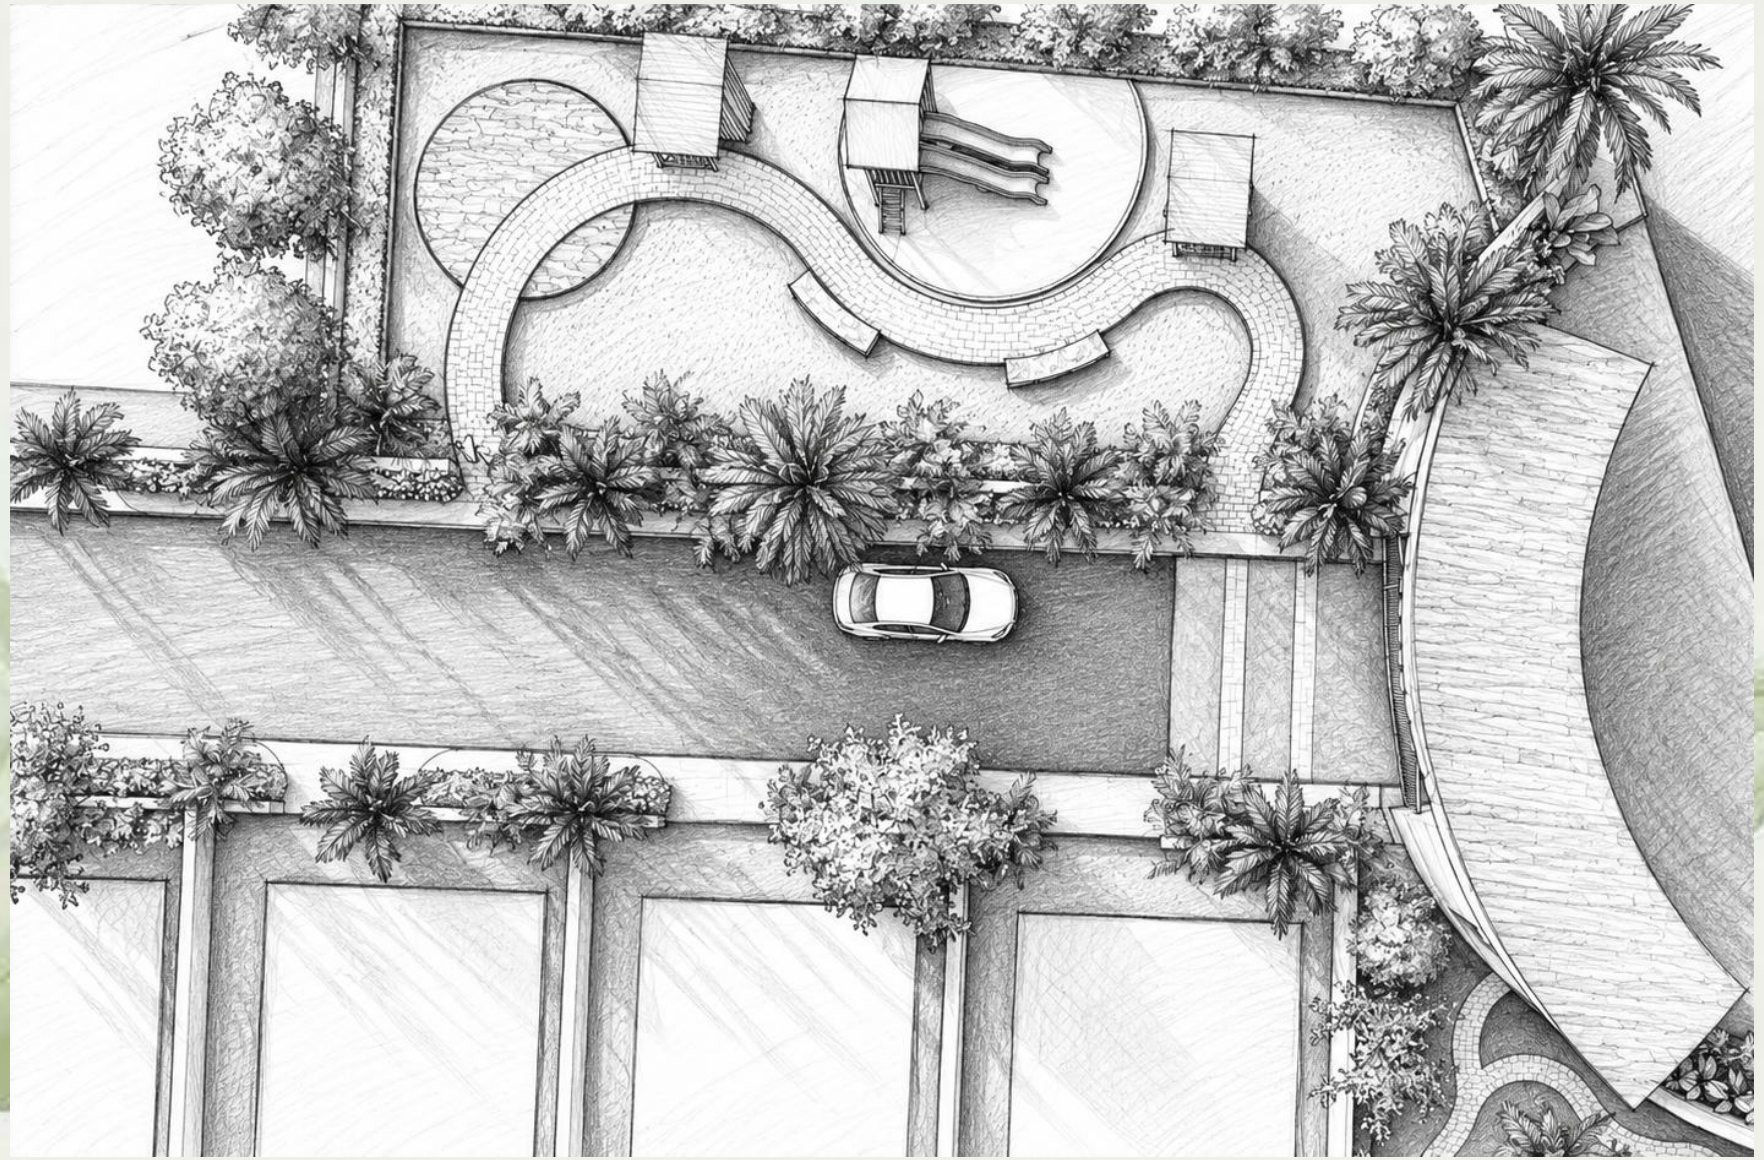
Rock palms



Rock Palms, designed by **FRG**, is a **35-acre gated community** where the landscape has been thoughtfully planned to foster recreation, relaxation, and community interaction. The project features well-designed parks, open green spaces, and dedicated gathering areas that encourage residents to connect and engage with one another. A balanced mix of lawns, shaded seating, walkways, and vibrant planting creates inviting outdoor environments for people of all age groups. The landscape seamlessly integrates functionality with aesthetics, enhancing the overall living experience within the community

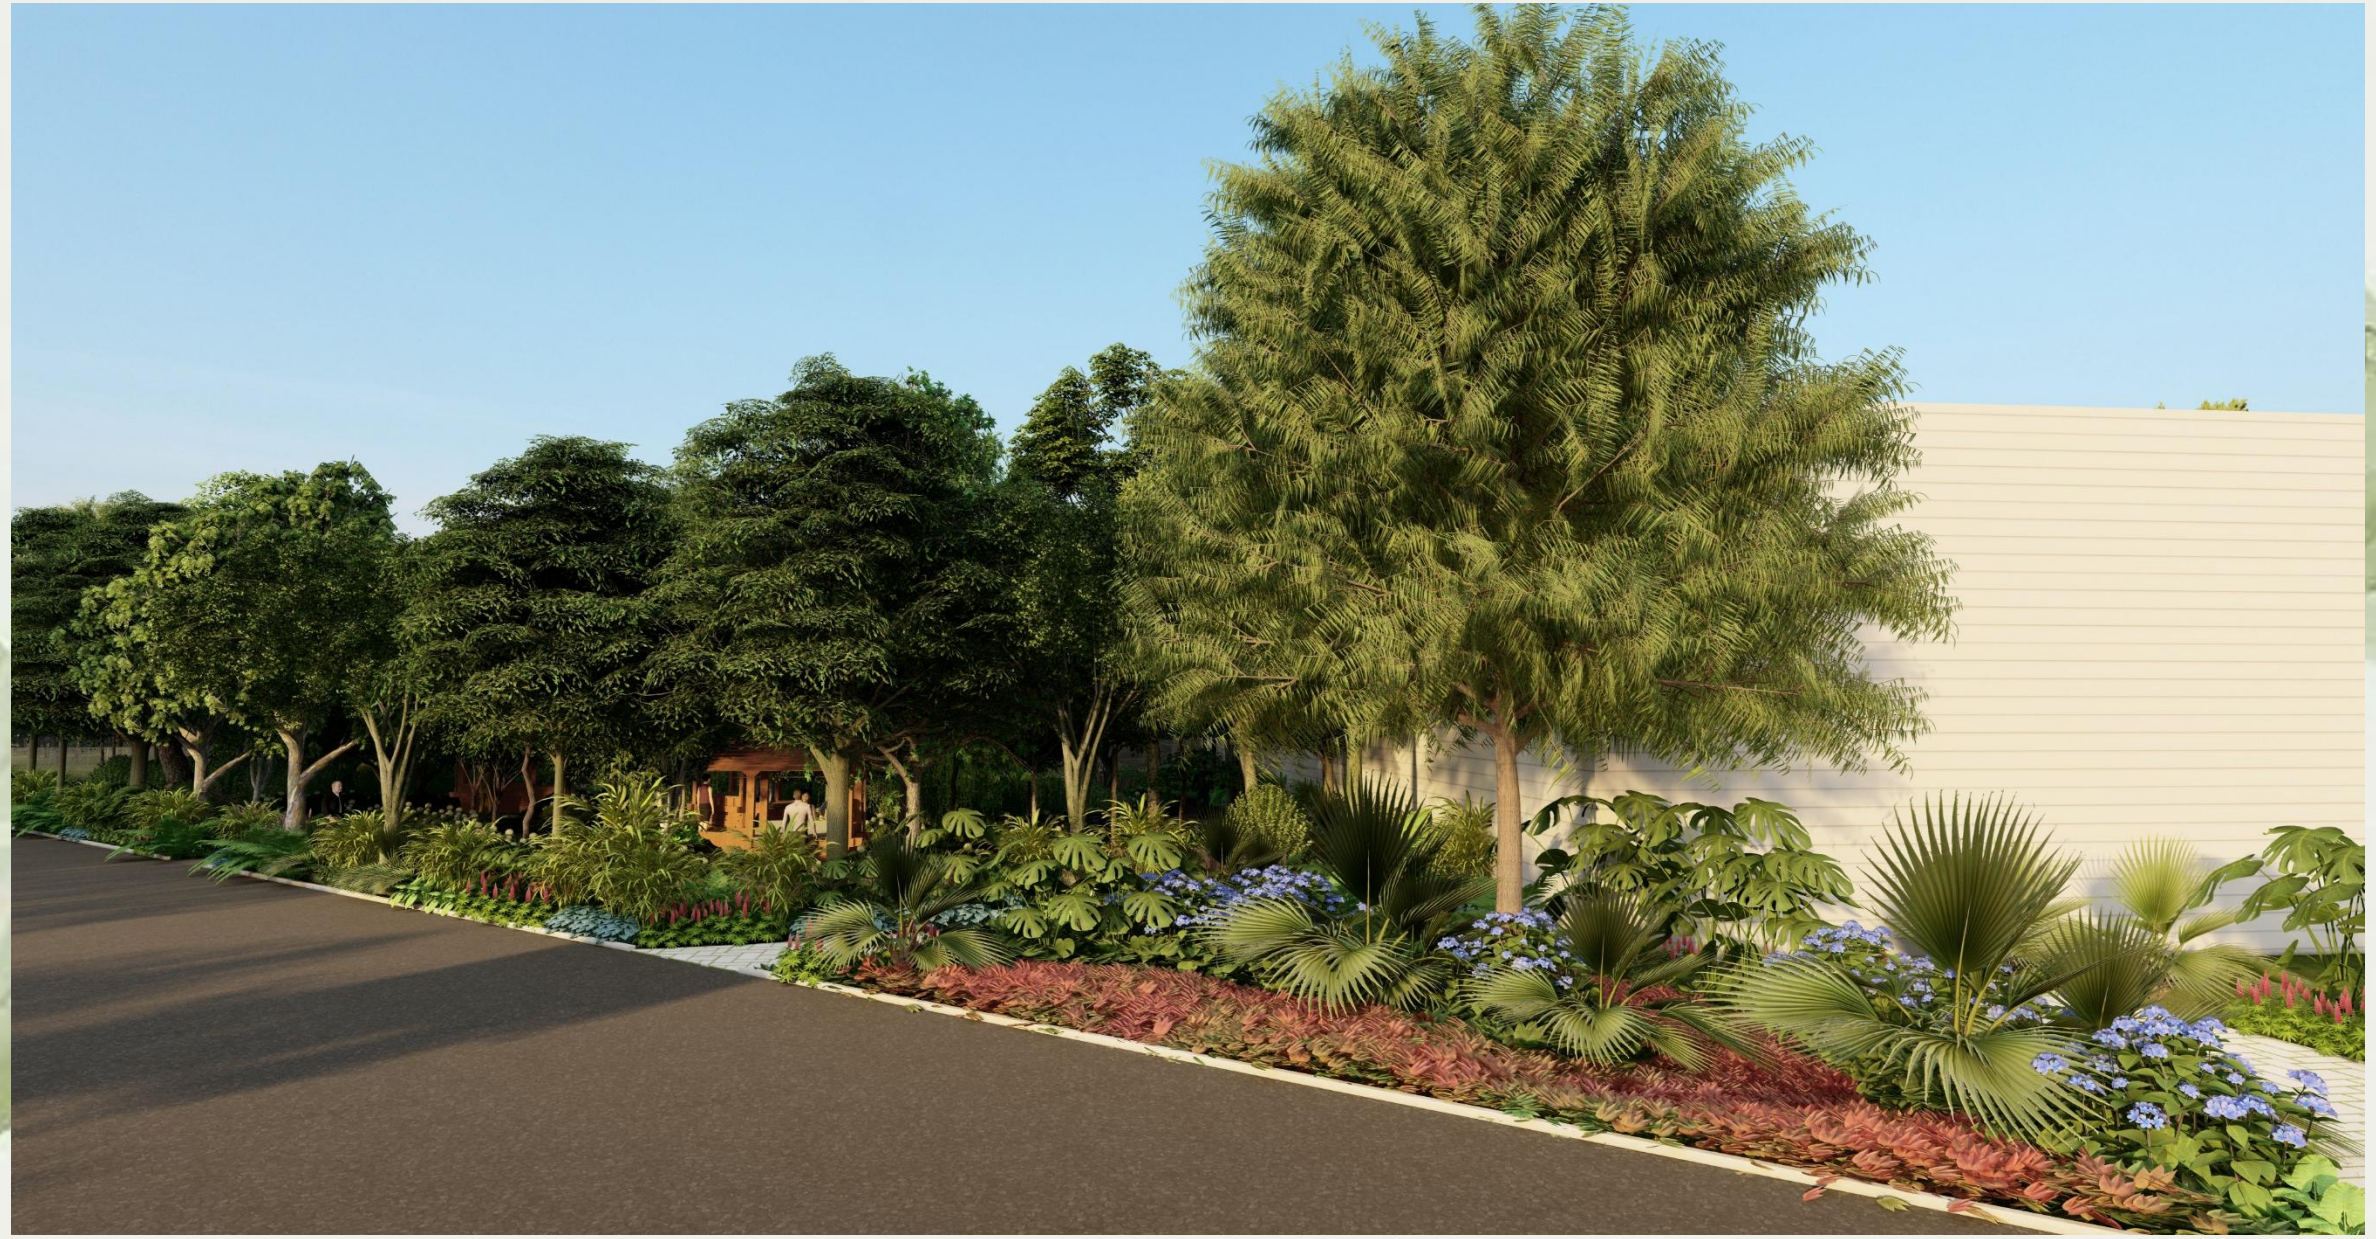
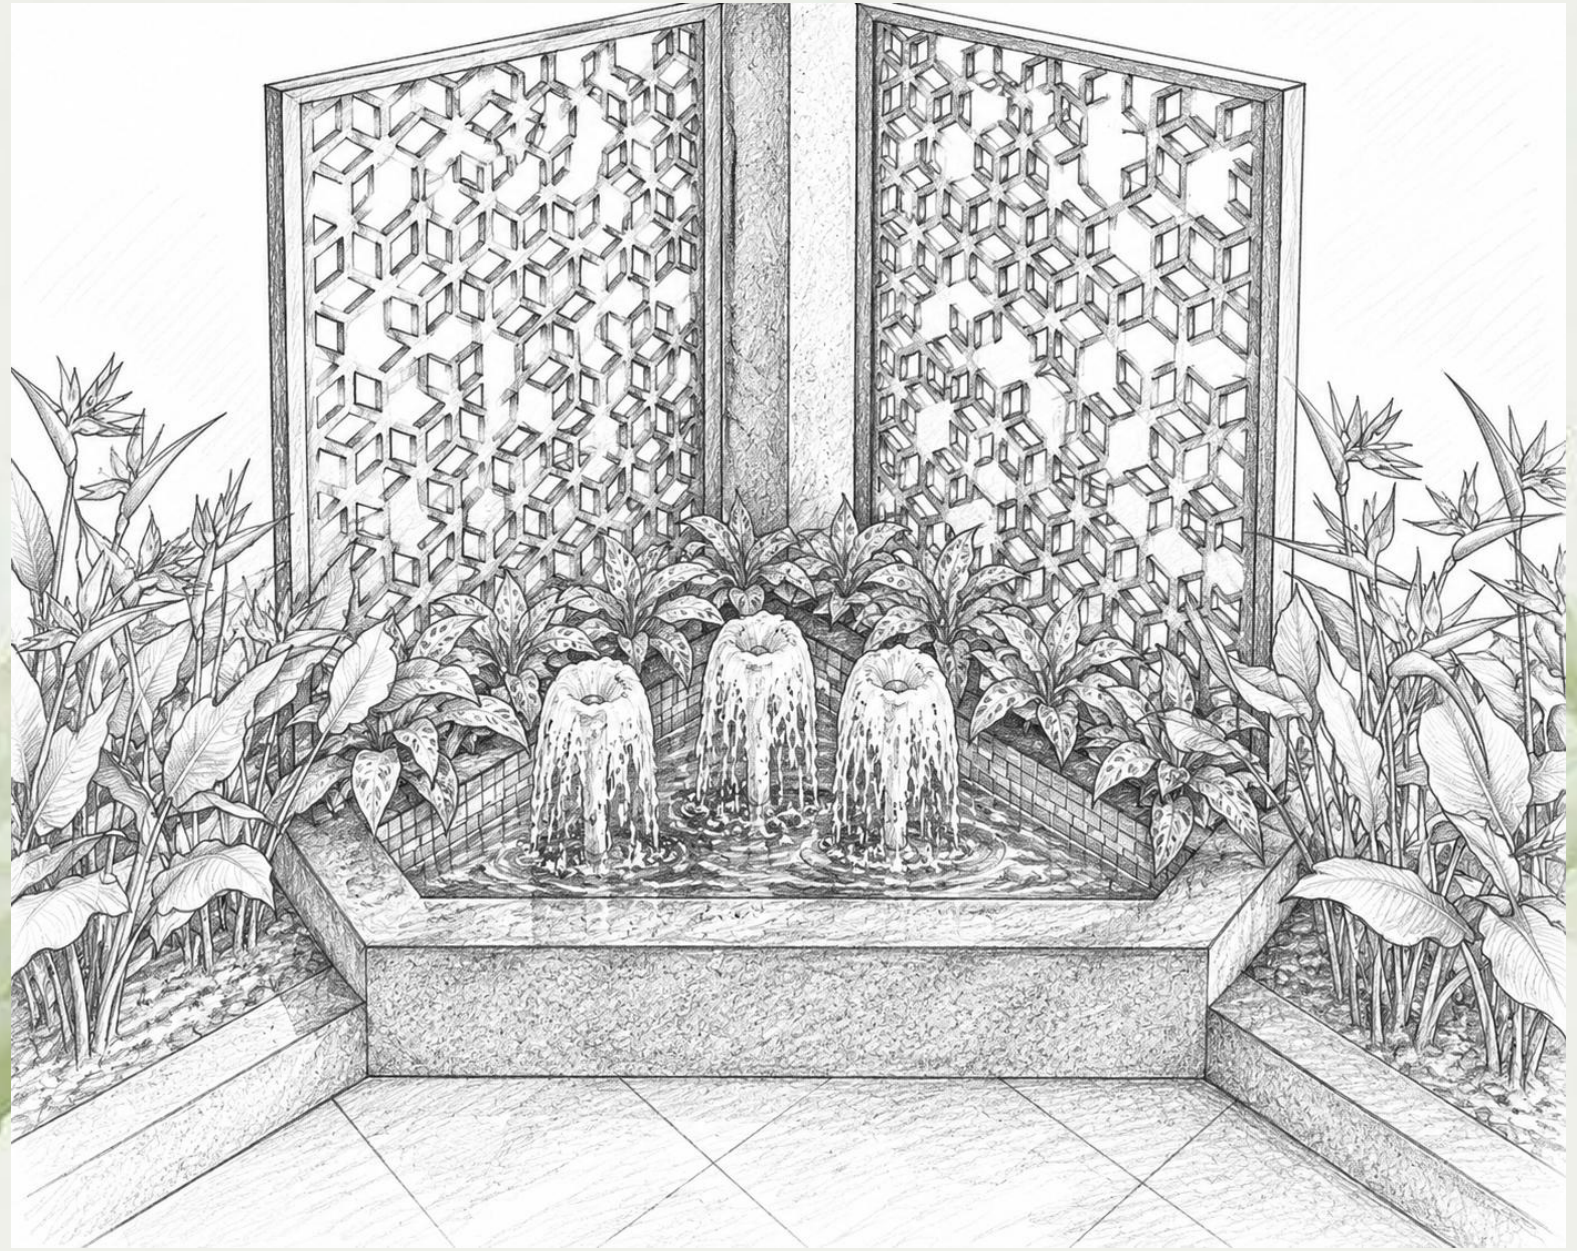
Nature canvas

Nature canvas , designed by **FRG**, is a **42-acre gated community** envisioned to bring the essence of a natural forest into a residential environment. The project's core concept is to create a self-sustaining landscape using predominantly native tree species that enhance biodiversity and provide a thriving habitat for birds and local wildlife. A carefully planned **Seven-layer planting strategy**—comprising canopy trees, understory vegetation, and ground covers—has been adopted to replicate the structure and character of a natural forest, offering residents a serene, immersive, and ecologically rich living experience.

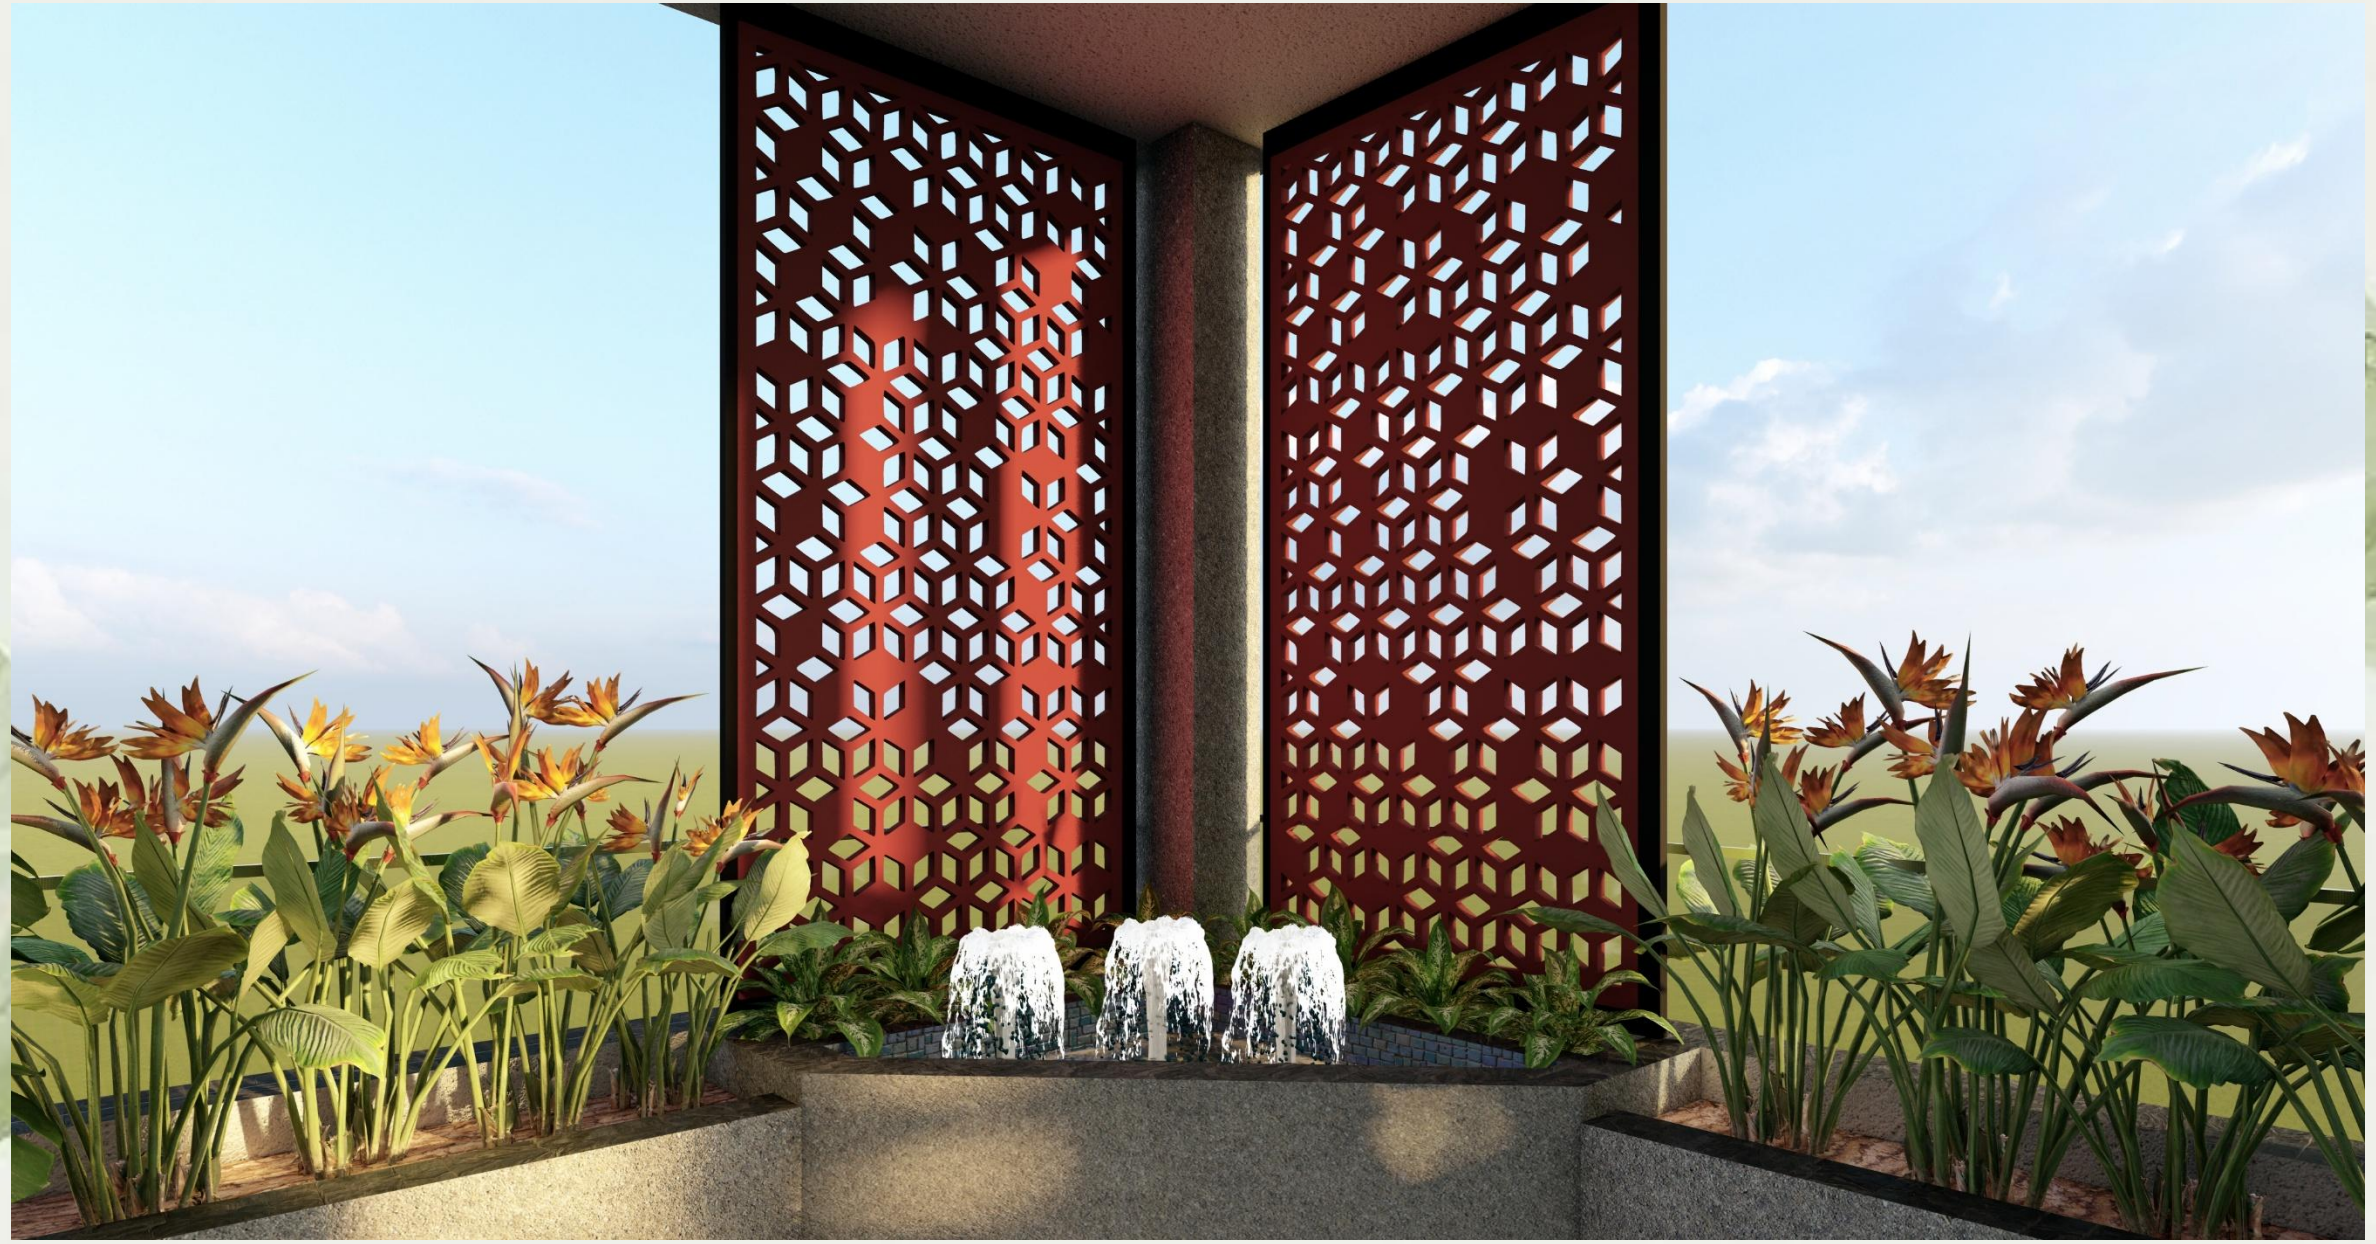


Cozy Terrace



Cozy Terrace, designed by **FRG**, demonstrates how even a compact terrace can be transformed into a functional and aesthetically pleasing outdoor space. The design integrates built-in seating within the planter boxes, maximizing space while creating a comfortable area for relaxation.

A dedicated corner nook has been enhanced with feature planting, serving as a striking focal point that adds depth and character to the terrace. The result is a simple, elegant, and inviting space for everyday use.



Serenity Green

Designed by **FRG**, is envisioned with a landscape that seamlessly extends the indoor living spaces rather than existing as a separate element. The design creates a natural flow between the interiors and outdoors, enhancing the overall living experience.

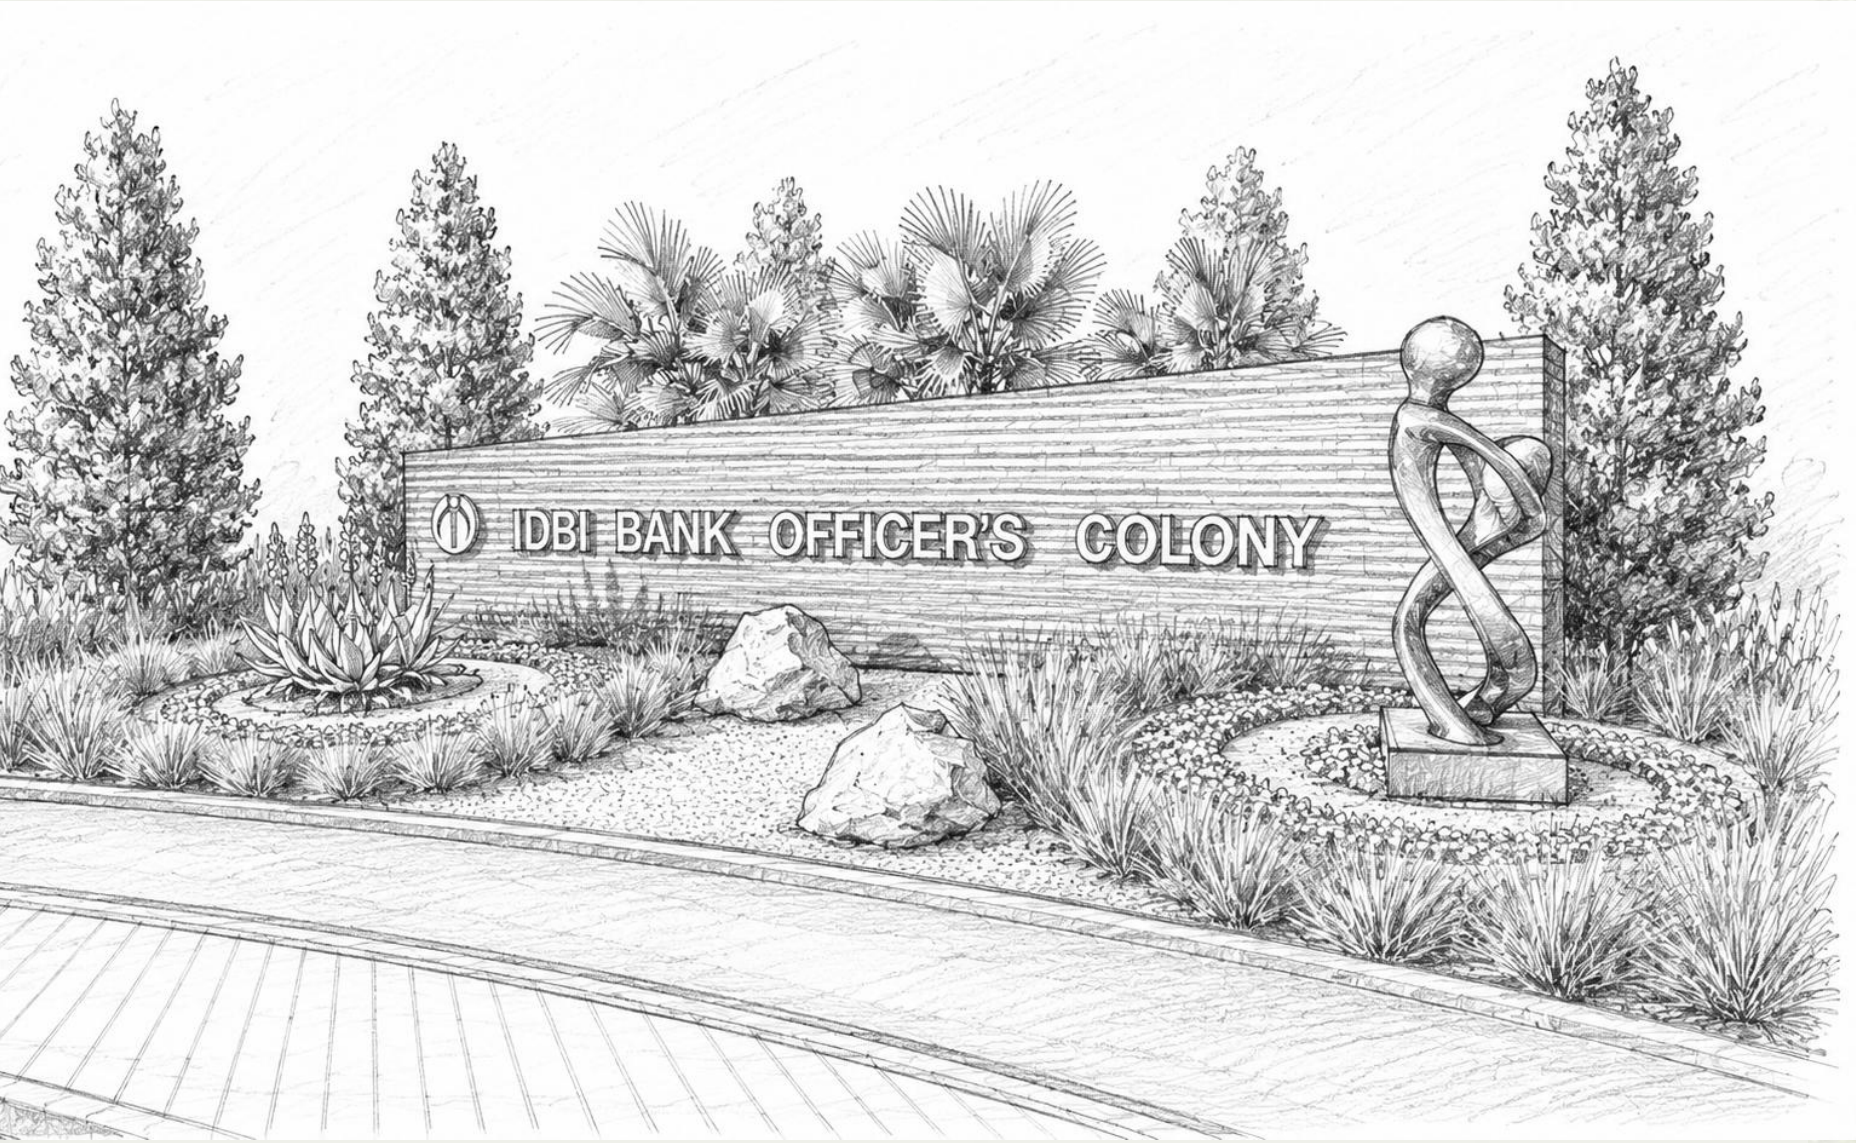
Kept simple yet elegant, the landscape offers a warm and inviting ambience, making it an ideal setting for relaxed evenings with family and friends. The project reflects a perfect balance of functionality, comfort, and understated aesthetics

Whisper wood farm

Subrahmanyam Farmhouse, designed by **FRG**, is a serene weekend retreat located on the outskirts of Hyderabad. Surrounded by lush natural greenery, the landscape embraces a minimal planting approach to preserve the site's natural character. The farmhouse features sports courts, a pergola for shaded outdoor seating, a spacious party lawn for family gatherings and celebrations, and a shallow inflatable pool for recreation.

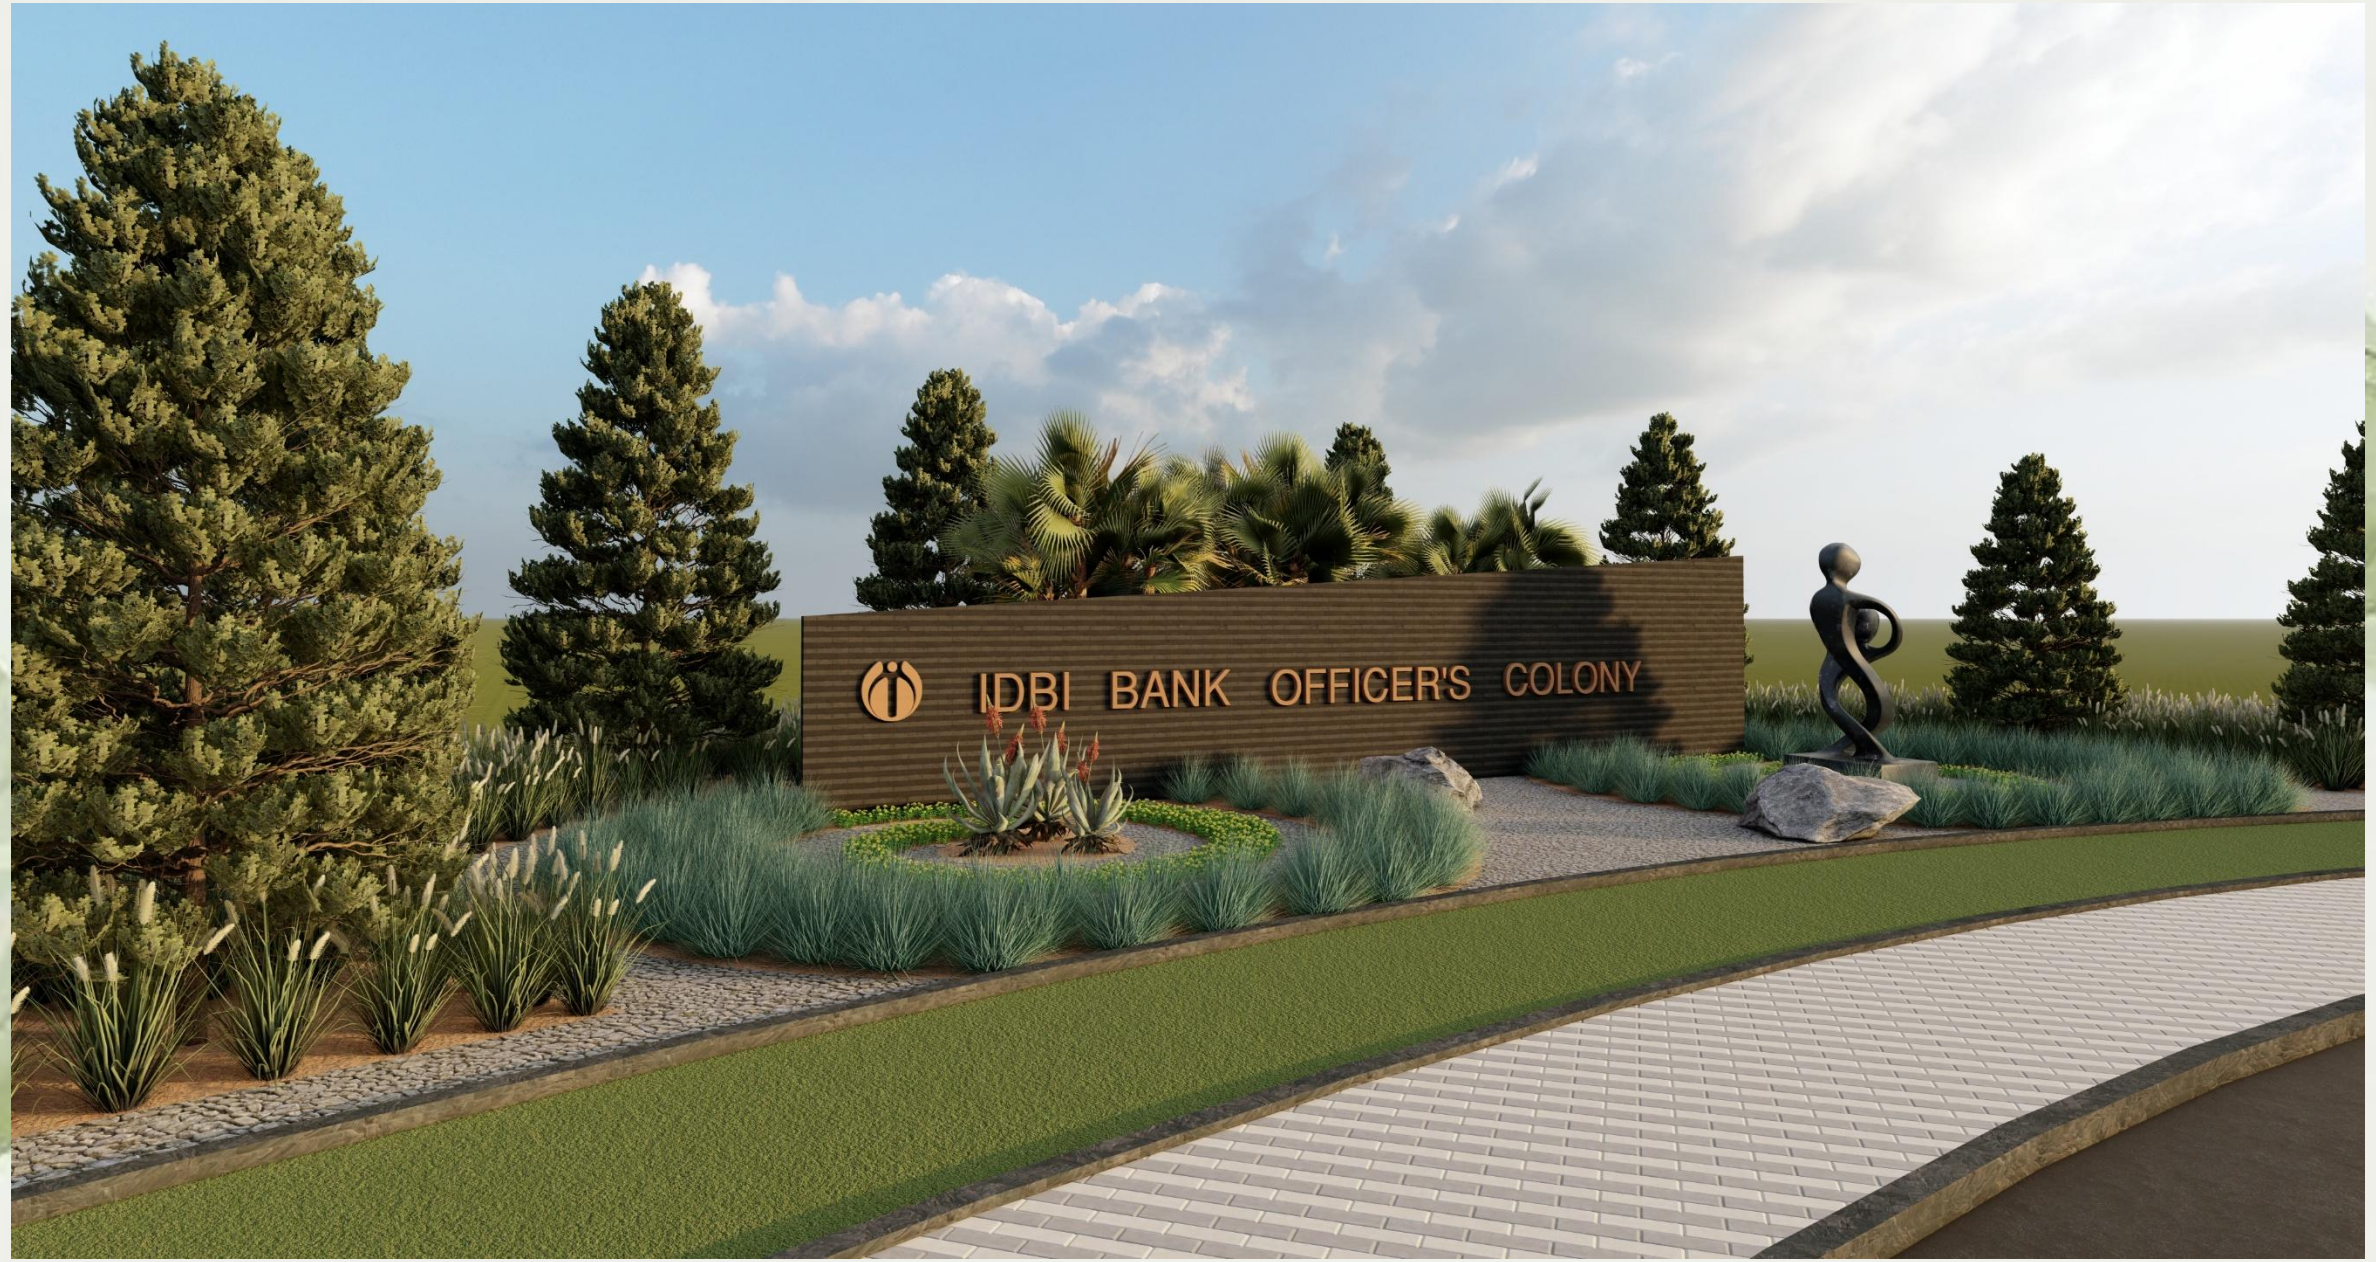
Thoughtfully planned, the design offers a harmonious blend of comfort, functionality, and nature, creating an ideal space for relaxation and memorable family moments.

Bank Officers' Colony

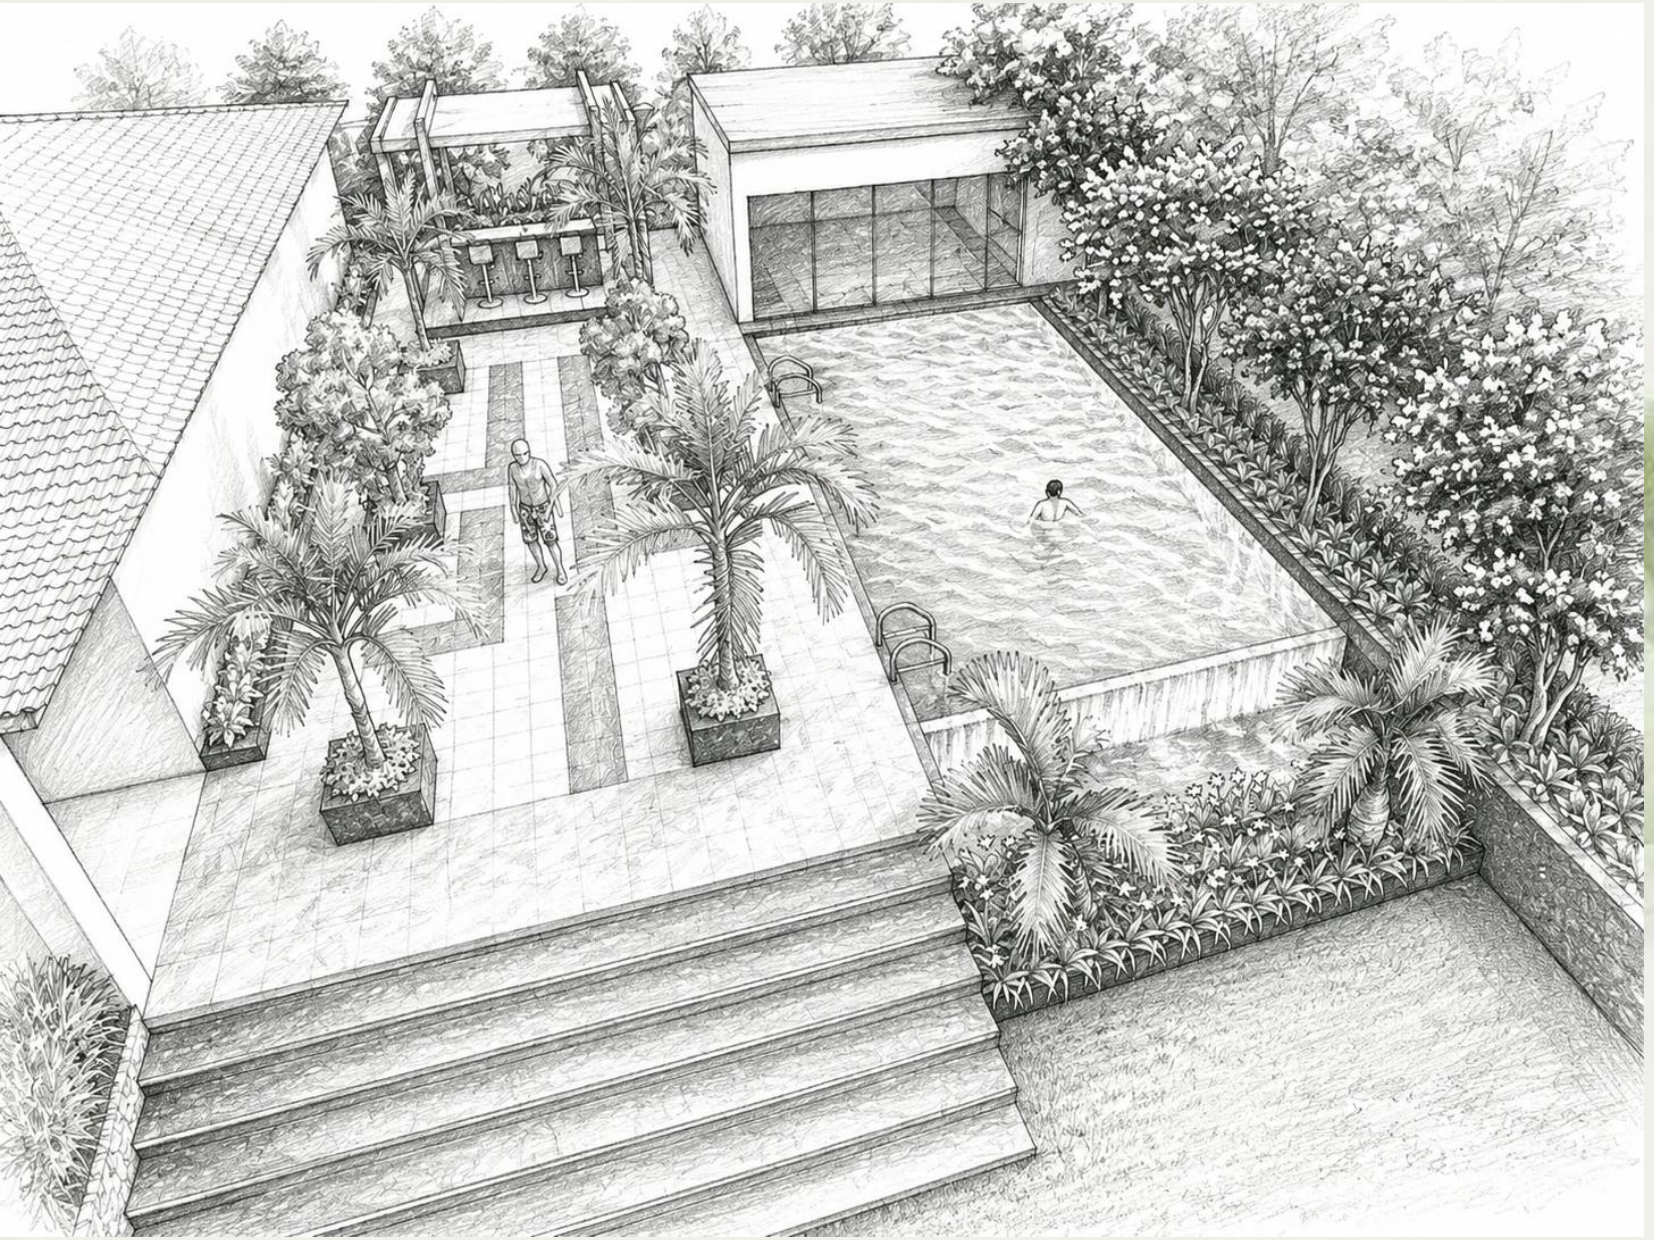


Bank Officers' Colony, designed by **FRG**, has been thoughtfully planned in accordance with the client's design standards and requirements. The entrance serves as the project's defining feature, showcasing elegant water features, natural boulders, and lush plantation that together create a striking first impression.

The carefully curated landscape welcomes residents with a serene and refreshing ambience, setting the tone for the community while enhancing its visual appeal and providing a memorable arrival experience.



IDBI BANK OFFICER'S COLONY

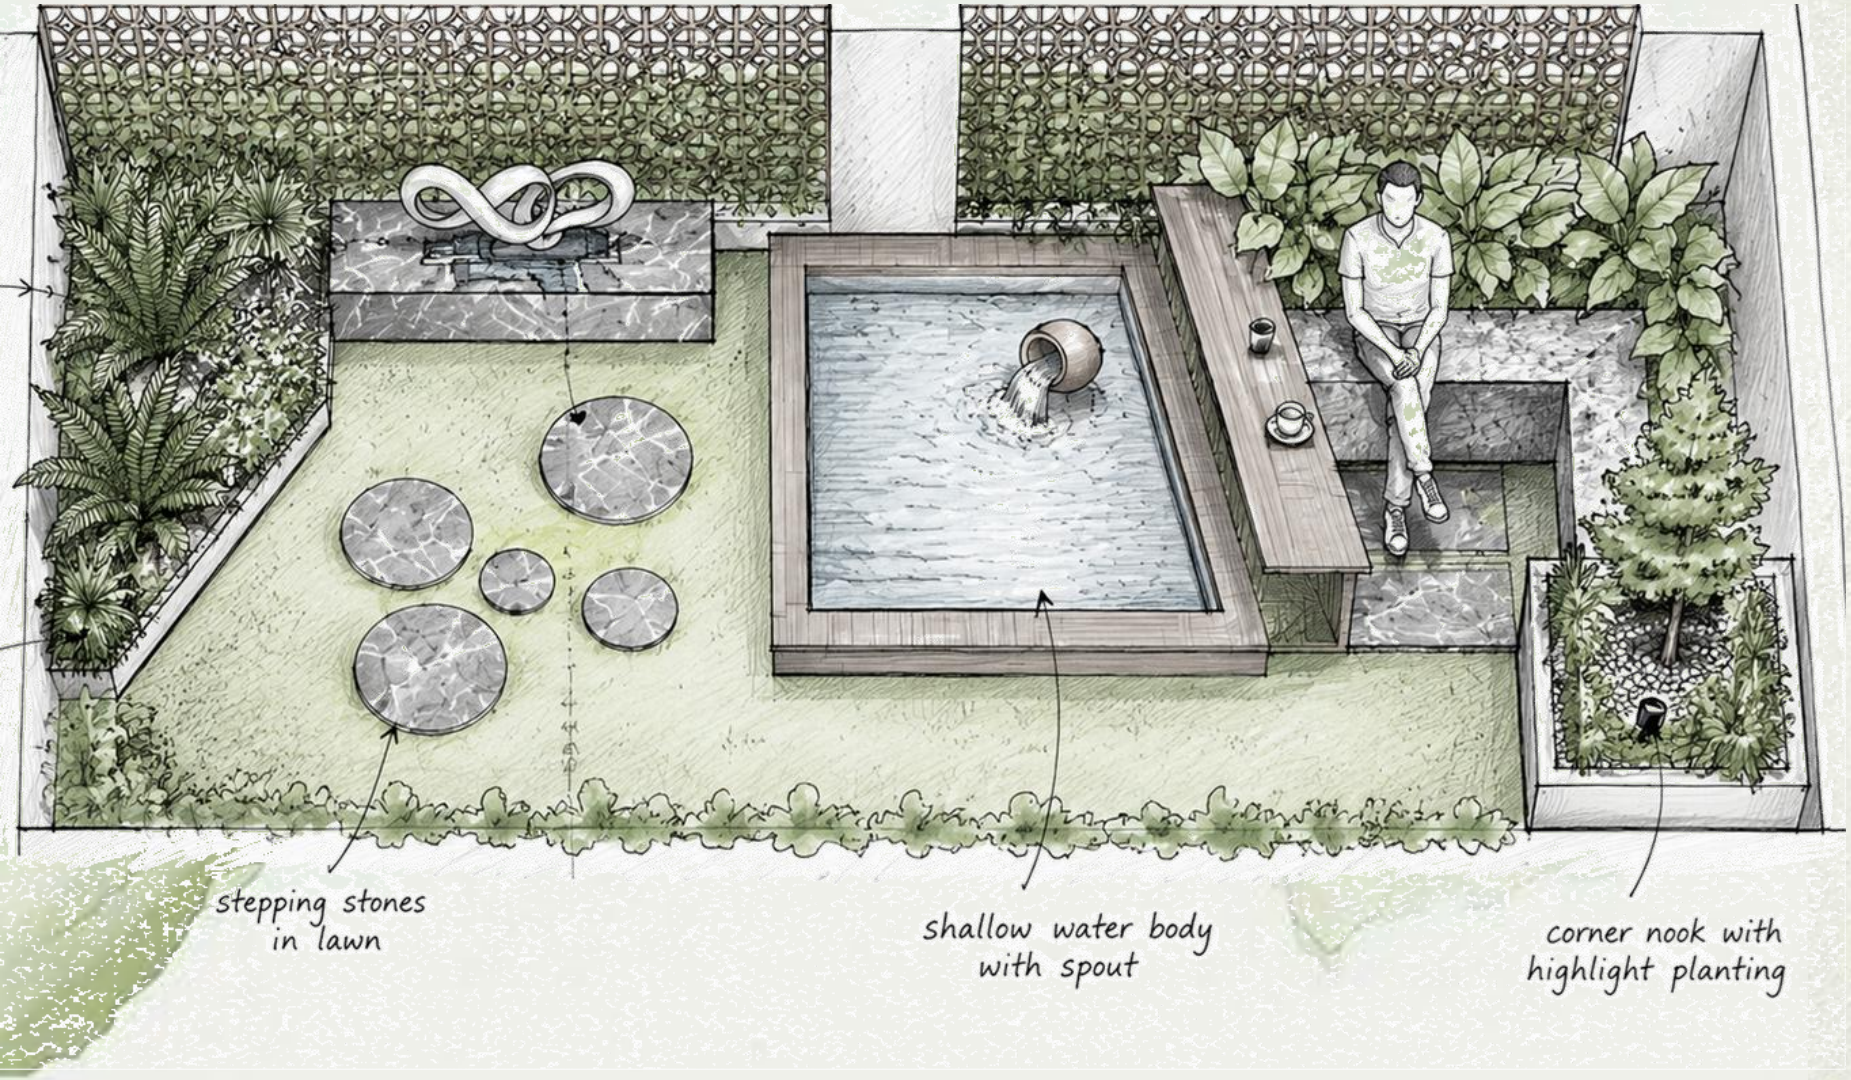


The Fernery

Anil Reddy Farmhouse, designed by **FRG**, is a **1.3-acre commercial farmhouse** envisioned as a premium rental destination for private events and weekend getaways. The design focuses on creating a simple yet visually appealing environment that caters to a wide range of visitors.

A well-planned swimming pool serves as the central attraction, complemented by thoughtfully designed activity zones, open lawns, and leisure spaces. The landscape strikes a balance between functionality and aesthetics, offering guests a relaxing, welcoming, and memorable outdoor experience.

The Elevated Eden



Aditya Terrace is a compact rooftop landscape **designed by FRG** to create a cozy and functional outdoor retreat for a family. Thoughtfully planned to make the most of the available space, the design features a tranquil water body adjacent to the seating area, adding a soothing visual and sensory element that enhances the overall outdoor experience.

A compact pavilion has been incorporated to provide shade and a comfortable seating space during harsh climatic conditions, ensuring the terrace remains usable throughout the day. The seamless integration of landscape elements, water, and sheltered seating transforms this small terrace into a peaceful and inviting extension of the home.

Nature Inspired tranquil

KVR Twin Town is a prestigious **120-acre premium plotted township** with iconic entrance gateways from both the **Visakhapatnam** and **Vizianagaram** highways. Crafted to redefine modern community living, the development offers a host of world-class lifestyle amenities, including a beautifully designed **Wedding Lawn**, **Party Lawn**, landscaped gardens, recreational zones, and several premium outdoor spaces.

The entire landscape has been masterfully designed by **FRG**, ensuring a perfect balance of elegance, functionality, and sustainability. Every space within the township has been thoughtfully curated to provide residents with an elevated living experience amidst lush green surroundings and exceptional community infrastructure.

Beach 4

Beach Club

Emerald vista

The master plan was designed across a 26-acre site, with 3% of the total land area thoughtfully allocated for landscaping. This landscape was envisioned as a serene, nature-inspired community space that fosters social interaction, relaxation, and well-being. Carefully curated with lush greenery, shaded seating areas, walking paths, and open gathering spaces, the landscape serves as the heart of the development—a peaceful retreat where residents can connect, celebrate community events, and enjoy moments of tranquility amidst nature. The design seamlessly blends aesthetics with functionality, creating an inviting environment that enhances both the ecological value and the overall quality of life within the community.
